Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection on. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Allowable Subject Matter

2. Claims 29, 30, 32, 33, 35 and 39-46 are allowed.

3. The following is an examiner's statement of reasons for allowance: Claim 29 contains allowable subject matter for at least the reason that the prior art of record fails to teach or reasonably suggest a method for producing a pulse train comprising the constant amplitude, wavelength modulated source provision step with the long fiber Bragg grating dispersive element directing step as claimed. Claim 41 contains allowable subject matter for at least the reason that the prior art of record fails to teach or reasonably suggest a method for generating a pulse train comprising the continuous wave, frequency modulated provision step with the compressive dispersive element impinging steps as claimed. While Galvanauskas (US 5,400,350) teaches a method for generating pulses, Galvanauskas fails to show frequency or wavelength modulation of a source as claimed in the instant application. Stock (US 6,249,630) teaches a pulsed source traversing a dispersive element, but fails to show frequency or wavelength modulation prior to traversal. Shigehara (US 5,771,250) shows a chirped source and chirped dispersive

element, but fails to specifically show a continuous wave or constant amplitude source, and also fails to show pulse compression.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
